The subject property is undeveloped, zoned interim – rural residence (I-RR, upon its annexation into the City limits) and is accessed by way of Bradshaw Road. The zoning area is the western portion of the Zachary Scott subdivision; the eastern portion is across Bradshaw Road. The River Ridge manufactured home community is to the north (County), Onion Creek subdivision (I-SF-2) is to the west and a subdivision to be known as Legend's Way is to the southeast (I-RR). S.M.A.R.T. Housing Certification
 Lennar Buffington Zachary Scott Subdivision
 Southeast of Intersection of Old Lockhart Rd and Bradshaw

TO WHOM IT MAY CONCERN:

Lennar Homes (Paul Powell, 418-0258 x274 (o), 294-4146 (m), Paul.Powell@Lennar.com) is planning to develop a 992 unit single-family development southeast of intersection of Old Lockhart Rd and Bradshaw Rd. This proposed development is not in an active City of Austin Neighborhood Planning Area.

NHCD certifies that the proposed construction meets the S.M.A.R.T. Housing standards at the pre-submittal stage. Since 60% of the homes will serve households at or below 80% Median Family Income (MFI) or below, the development will be eligible for full waiver of the fees listed in Exhibit A of the S.M.A.R.T. Housing Resolution adopted by the City Council. The expected fee waivers include, but are not limited to, the following fees:

Capital Recovery Fees	Concrete Permit	Mechanical Permit
Building Permit	Electrical Permit	Plumbing Permit
Construction Inspection	Subdivision Plan Review	Zoning Verification
	Regular Zoning Fee	Land Status Determination

Prior to filing of building permit applications and starting construction, the developer must:

- ♦ Obtain a signed Conditional Approval from the Austin Energy Green Building Program stating that the plans and specifications for the proposed development meet the criteria for a Green Building Rating. (Austin Energy: Dick Peterson, 482-5372).
- ♦ Submit the S.M.A.R.T. Housing Residential Completeness Check, Permit Application, and plans demonstrating compliance with visitability and transit-oriented standards to single-family permit intake staff at One Texas Center, 505 Barton Springs Road.

Before a Certificate of Occupancy will be granted, units in the development must:

- ♦ Pass a final inspection and obtain a signed Final Approval from the Green Building Program. (Separate from any other inspections required by the City of Austin or Austin Energy).
- ♦ Pass a final inspection by NHCD to certify that visitability and/or accessibility and transit-oriented standards have been met.

The applicant must demonstrate compliance with the reasonably-priced standard after the completion of the homes, or repay the City of Austin in full the fees waived for this S.M.A.R.T. Housing certification.

SUMMARY STAFF RECOMMENDATION:

The Staff's recommendation is to grant single family residence small lot (SF-4A) district zoning.

BASIS FOR LAND USE RECOMMENDATION (ZONING PRINCIPLES)

- 1. The proposed zoning should be consistent with the purpose statement of the district sought.*

The single family residence small lot (SF-4A) district is intended as an area for moderate density single-family residential use, with a minimum lot size of 3,600 square feet. In appropriate locations, small lot single-family use is permitted under standards that maintain single-family neighborhood characteristics.

- 2. Zoning changes should promote compatibility with adjacent and nearby uses.*

Staff is recommending SF-4A zoning as it is compatible use and zoning with the surrounding residential subdivisions, and is consistent with the Council's policy of providing opportunities for S.M.A.R.T. Housing to occur.

EXISTING CONDITIONS

Site Characteristics

The site is undeveloped and slopes to the west towards the confluence of Onion and Rinard Creeks, which form the western boundary.

Impervious Cover

The maximum impervious cover allowed by the SF-4A zoning district would be 55%, which is based on the more restrictive zoning regulations.

Environmental

The site is not located over the Edward's Aquifer Recharge Zone. The site is in the Desired Development Zone. The site is in the Onion and Rinard Watersheds of the Colorado River Basin, which is classified as a Suburban Watershed by Chapter 25-8 of the City's Land Development Code. Under current watershed regulations, development or redevelopment on this site will be subject to the following impervious cover limits:

<i>Development Classification</i>	<i>% of Net Site Area</i>	<i>% with Transfers</i>
Single-Family (minimum lot size 5750 sq. ft.)	45%	50%
Other Single-Family or Duplex	55%	60%
Multifamily	60%	70%
Commercial	80%	90%

According to flood plain maps, there is floodplain within, or adjacent to the project boundary. Based upon the close proximity of flood plain, offsite drainage should be calculated to determine whether transition zone exists within the project location. If transition zone is found to exist within the project area, allowable impervious cover within said zone should be limited to 30%.

Standard landscaping and tree protection will be required in accordance with LDC 25-2 and 25-8 for all development and/or redevelopment.

Under current watershed regulations, development or redevelopment on this site will be subject to the following water quality control requirements:

Structural controls: Sedimentation and filtration basins with increased capture volume and 2 year detention.

Transportation

No additional right-of-way is needed at this time. Street right-of-way dedication is being addressed during the subdivision process with the Zachary Scott preliminary plan (C8-04-0033.01.SH) and final plat applications (C8-04-0033.1A.SH, C8-04-0033.2A.SH, C8-04-0033.3A.SH).

The trip generation under the requested zoning is estimated to be 6,860 trips per day, assuming that the site develops to the maximum intensity allowed under the zoning classification (without consideration of setbacks, environmental constraints, or other site characteristics).

- a) Based on the approved preliminary plan for the subdivision, there are 59 residential lots proposed which is estimated will generate 563 trips per day

Water and Wastewater

The landowner intends to serve each lot with City of Austin water and wastewater utilities. The landowner, at his own expense, will be responsible for providing the water and wastewater utility improvements, offsite main extension, and system upgrades. The water and wastewater utility plan must be reviewed and approved by the Austin Water Utility. The plan must be in accordance with the City design criteria. The water and wastewater utility construction must be inspected by the City.

Compatibility Standards

The requested zoning does not trigger the application of compatibility standards.
